

Products Marketed

Super Enamelled Copper

Wires are being manufactured using state of art technology, with a capacity of over 6000 tons a year

Diameter

6.4mm to 0.1mm

Packing

4Kgs to 90Kgs packed in tapered and parallel spools

Aluminium Wires

Wires are being manufactured using state of art technology, with a capacity of over 2000 tons a year

Standard

Wires confirming to IS, IEC, JIS, DIN, Nema or as per customers requirement

Diameter

6.4mm to 0.1mm

Packing

4Kgs to 90Kgs packed in tapered and parallel spools

Standard

Wires confirming to IS, IEC, JIS, DIN, Nema or as per customers requirement

Bare Hard & Annealed Copper Wires

Wires are produced using state of art rod breakdown machine with inline resistance annealer, spooler and coiler with a capacity of more than 8,000 tons a year

Diameter

6.4mm to 0.1mm

Packing

20Kgs to 3000Kgs

Raw Material

Electrolytic Tough Pitch Continuous Cast Copper Wire Rod as per ASTM B49

Oxygen Free High Conductivity Continuous Cast Copper Wire Rod as per ASTM B49-08a
